

## BLENDING AND MOVEMENT AUTOMATION (BMA) OM&S - TASK MONITOR MODULE – SERIES 50

### Course Overview

**Course number: 6610**

**Course length: 2 days**

### Maintaining your Offsites applications

This Oil Movement and Storage (OM&S) Maintenance Training course provides operations and maintenance engineer training information to Honeywell customers using Task Monitor Module (TMM) in a combined lecture and lab environment.

Topics covered include:

- Application Functional Overview
- Application Setup and Monitoring
- Software Structure and Configuration
- Troubleshooting and Maintenance

### Course Benefits

#### Maximize the benefits from your OM&S applications

- Improve speed of response to operational questions and issues raised.
- Optimize configuration and site-specific tuning of your application. Many configuration and tuning changes can be done by site engineers.
- Build front-line troubleshooting skills to handle local problems, and for optimal interactions with your Honeywell Application Support team.
- Improve your ability to isolate system and configuration issues from application problems.

### Course Delivery Options

- In-Center Instructor-Led Training
- On-Site Instructor-Led Training

### Who Should Take This Course?

#### Offsites system owners and troubleshooters

All customers charged with maintaining and troubleshooting their site's TMM application:

- Offsites engineering staff
- Offsites supervisors/managers
- Movements planners/schedulers

### Prerequisite/Skill Requirements

#### Prerequisite Course(s)

- None

#### Required Skills and/or Experience

- None

#### Desirable Skills and/or Experience

- Knowledge of the Honeywell TPS environment including GUS Picture Builder, DEB, AM/CL, PM/CL.
- Knowledge of your site's Offsites TPS architecture.
- Knowledge of your site's Offsites operations.

### Course Topics

#### You will learn how to....

- Operate the Series 50 OM&S core module software. The Series 50 OM&S applications' operator interface uses NT-based graphics.
- Provide first line support of offsite operations.
- Develop OM&S troubleshooting and maintenance techniques for your site specific application.
- Make minor configuration changes to tune system and meet operational needs.
- Provide a knowledgeable customer focal point for discussion of OM&S issues among management, operations and maintenance.

### Additional Training

To increase your knowledge and skills, there are additional courses available from Automation College.
