HONEYWELL SEMINARS UK 2011

**Predictive Maintenance –
the future is clear**

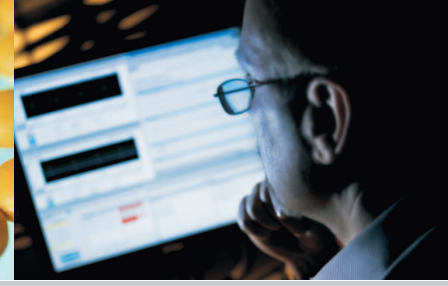

Looking into new technology that unlocks the hidden knowledge within your field devices

Honeywell Process Solutions is pleased to invite you to a series of seminars entitled “Predictive Maintenance – the future is clear”.

Businesses today understand the importance of asset maintenance and management. Predictive maintenance is an integral part of this philosophy, being able to accurately predict the health and status of assets enables informed decisions to be made regarding maintenance cycles and interventions. Predicting the status of equipment health leads to direct cost saving benefits and improves your bottom line. The Seminar will cover the subjects of gathering the “hidden” data, managing the field data effectively and how data can be brought together to assist you to make informed decisions regarding asset status.

These topics will be supplemented with live demonstrations of wireless and asset data gathering applications.

**Honeywell Seminars
