

Squeeze More Out of Your Operations Technology Seminar 2009

Challenging times require solutions that squeeze more out of your operation.

Protect your automation technology investment and get more out of your existing infrastructure with solutions from Honeywell.

We aim to achieve this through a program that will provide you with knowledge on Honeywell's vision, technology and expertise.

Other highlights include:

- Getting More Out of Your Investment with Honeywell's Small Project Solutions
- Improve System and Process Management with Remote Services
- Improving Performance and Safety in a Tough Market - Operator Training and Simulation
- Positioning for the Future - System Planning
- Wireless Technology - Enabling More Efficient Plant Automation and Operations
- Energy Management and Carbon Management Solutions
- Key Technology Updates - Experion, Field Solutions, Access Control and Security amongst others

All this so you can re-energize your operation while reducing costs and emissions - safely, securely, reliably and efficiently.

Dates:

19 & 20 August 2009

Venue:

Honeywell
19 Corporate Drive
Cannon Hill QLD
