

Honeywell

TECHNOLOGY SEMINAR 2010 PROGRAM - NEW PLYMOUTH -

THURSDAY 11 MARCH 2010	
8.00am	<i>Registration – Blenheim Foyer</i>
Room:	Blenheim
8.30am	Welcome Address
8.40am	Honeywell Overview and Technology Mike Sinclair
9.15am	Experion and Wireless Update Greg Belcher <p>Get a glimpse into Honeywell's longer term direction for the Experion platform and how these developments will open up a wider range of solutions and continue to improve plant efficiency and reliability. This roadmap will also provide attendees with an overview of any significant updates in Experion platform releases that are coming in the near future.</p>
10.15am	<i>Morning Refreshments - Essex</i>
Room:	Blenheim
10.30am	Video Integration and Management Greg Belcher <p>Integration of video and security systems to the control system is allowing operators to observe their plant in new ways. This presentation will provide an overview of Honeywell's Digital Video Manager (DVM) package and the view available through Experion.</p>
11.15am	Safe Operation and Abnormal Situation Management Bob Weiss <p>Ensuring safe operation of your facility is paramount in providing a safe work place for all site personnel and prevention of environmental or integrity incidents. This presentation will discuss two of the key contributors to safe operation - Abnormal Situation Management (ASM) and Functional Safety Management. An overview of ASM will include an introduction to effective alarm management and the AAM suite of tools, and a brief introduction to ASM display design. The presentation will also discuss Honeywell's role in improving functional safety management.</p>
12.15pm	How Advanced Process Control Solutions Provide Attractive Returns Nic Castelijns <p>Learn how our latest advanced process solutions can directly impact your profitability and create ROI in as little as 6 months.</p>
12.45pm	<i>Lunch - Essex</i>
Room:	Blenheim
1.30pm	Energy Efficiency Solutions for Process Plants Nic Castelijns <p>Honeywell has brought together a broad range of its technology to create a portfolio of Energy Efficiency Solutions. Honeywell offers a solution consulting approach, tailoring a series of energy-related solutions to client needs. This presentation will examine some elements of the Energy Management Solutions portfolio, including the Carbon Management Information System and real-time control applications.</p>
2.15pm	How Operator Training Improves Return on Capital Investments Nic Castelijns <p>One of the most critical assets deployed in plants today is the operator. These individuals possess the experience and knowledge necessary to make the right decision at the right time in the face of operating challenges encountered at a moment's notice. Encountering the real life scenarios that contribute to operator experience might normally take years of plant operation to acquire. Through the use of Operator Training Simulators, these experiences can be captured and presented effectively to the trainee, allowing them to learn from mistakes in the safety of a comprehensive training environment in significantly less time. During this session we will explore solutions and benefits Honeywell can provide.</p>
3.00pm	<i>Afternoon Refreshments - Essex</i>

Room:	Blenheim
3.15pm	<p>Uniformance Process Studio, PHD and BusinessFlex Update</p> <p>John McGregor</p> <p>An overview of the latest release of Uniformance PHD (data historian) and associated tools such as Uniformance Process Studio and BusinessFlex will be provided.</p>
4.00pm	<p>Field and Terminal Instrumentation and Solutions</p> <p>Greg Hudson</p> <p>Honeywell offers a comprehensive portfolio of process measurement and control solutions. During this session, an overview of Honeywell's field measurement solutions including Enraf level detection and terminal automation solutions will be provided.</p>
4.45pm	Demo & Networking – Essex
5.30pm	Close
