

**Make the most of your process control technology, today and tomorrow.**

## **Plan to Attend the Honeywell Users Group Conference.**

Rapid changes in process automation present a myriad of challenges but can bring significant opportunities. Whether you have need to harness the capabilities of legacy assets, optimize operations through migration or integration with advanced applications, or plan to expand production capabilities, Honeywell Users Group provides a forum for you to gain the knowledge and tools to meet your objectives.

There are few equivalent opportunities available for operators, production, instrumentation, manufacturing, maintenance and engineering and IT professionals to attend and gain exposure to a broad spectrum of technology. The conference is developed by users, for users, to ensure that the content is compelling to all attendees.

Learn why attendees consistently report that this cutting-edge conference helps them optimize their technology and management decisions for maximum productivity and profit.

## **The business benefits of attending Users Group include:**

**1. Fresh thinking from other Honeywell customers.** Users Group attracts a broad spectrum of users with similar needs and experiences. Attendees are exposed to a full range of fresh ideas regarding implementation, application, expansion and work practices related to process automation solutions and advancements. The agenda is designed by users for users to ensure the content is pertinent across all process industries, job functions and geographies.

**2. One-to-one discussions with Honeywell experts.** Have in-depth discussions with specific Honeywell product experts, technology partners and industry leaders to address specific challenges, infrastructure implementation or need for additional functionality.

**3. Future considerations.** Brainstorming and discussions between users, technology providers, engineering firms and Honeywell keep attendees on the forefront of the latest issues and challenges in the process control industry. They help guide future decisions regarding your operations and attendee input helps shape Honeywell's technical roadmap. It's an opportunity to ensure that our R&D is spent in areas that will impact your business needs, today and into the future.

**4. Hands-on activity with the latest technology.** Product sessions, simulations and demonstrations allow you to experience "technology in action." If your site has specific procurement plans or decision-making needs involving new solutions or new releases, you can evaluate capabilities and learn how to more effectively implement for results.

**5. Slick tricks and troubleshooting.** Interact with Honeywell system and application consultants, TAC engineers, Automation College trainers and development engineers. Your organization can achieve immediate results from learning sessions and group discussions on technical functionality.

**6. Training Match Fund.** If your company has selected the Training Match Fund option with their Solution Enhancement Support Program (SESP), you should see with your Honeywell account manager if there is enough funds left to be able to go to the Users Group. If your funds are

confirmed by your Honeywell account manager, and after you have attended the entire conference you will receive an EMEA HUG training certificate.

**7. Continue Your Education.** In addition to the conference, customers will have opportunity to attend training courses offered by Honeywell Process Solution, EMEA. These classes will provide opportunity to expand your knowledge and improve your productivity. They will be offered on Sunday 26 October and Thursday 30 October.

Register for the Honeywell Users Group, registration opens end of June 2008.

October 27-30, Estrel Convention Centre, Berlin, Germany
