

## Green, Lean and Safe

Honeywell is pleased to present two seminars in one day on topical subjects for Western Australian businesses: "Carbon and Energy Management" and "Emerging Best Practices in Project Execution". You are invited to attend either or both presentations, and also join us for lunch.

---

### Carbon and Energy Management – Understanding and Meeting the Business Challenges

- Registrations (Tea & Coffee) – 9:30am
- Start – 10:00am      • Finish – 12:00pm

- Greenhouse Gas Policy trends - What will they mean for industry in Australia?
- Understand the reporting obligations and potential pitfalls
- Carbon Pollution Reduction Scheme Implementation challenges - What is industry saying?
- Leverage your existing infrastructure to fulfill your National Greenhouse Energy Reporting obligations
- Maximise energy efficiency through addressing both the supply and demand side of your operation

---

### 12:00 LUNCH

---

### Emerging Best Practices in Project Execution – Getting it Right the First Time

- Start – 1:00pm      • Finish – 5:00pm
- Afternoon tea will be served at 3:00pm

#### Are any of these things of value to your organisation?

- Leveraging your investment in process modelling and design
  - Managing your workflow to control schedule and cost
  - Ensuring on time and safe commissioning
  - Maximising return on investment in automation technology
  - Minimising rework of control strategies and systems
  - Efficient access control, security and workforce management through construction to operations.
-
