

BLENDING AND MOVEMENT AUTOMATION (BMA)

OM&S - BLEND PROPERTY CONTROL – SERIES 40

Course Overview

Course number: 6606

Course length: 2 days

Maintaining your Offsites applications

This Oil Movement and Storage (OM&S) Maintenance Training course provides operations and maintenance engineer training information to Honeywell customers using Blend Property Control (BPC) in a combined lecture and lab environment.

Topics covered include:

- Application Functional Overview
- Application Setup and Monitoring
- BPC Objective Function
- Software Structure and Configuration
- Troubleshooting and Maintenance

Course Benefits

Maximize the benefits from your OM&S applications

- Improve speed of response to operational questions and issues raised.
- Optimize configuration and site-specific tuning of your application. Many configuration and tuning changes can be done by site engineers.
- Build front-line troubleshooting skills to handle local problems, and for optimal interactions with your Honeywell Application Support team.

Course Delivery Options

- In-Center Instructor-Led Training
- On-Site Instructor-Led Training

Who Should Take This Course?

Offsites system owners and troubleshooters

All customers charged with maintaining and troubleshooting their site's BPC application:

- Offsites engineering staff
- Offsites supervisors/managers
- Blend planners/schedulers.

Prerequisite/Skill Requirements

Prerequisite Course(s)

- 6604 - Blend Ratio Control

Required Skills and/or Experience

- None

Desirable Skills and/or Experience

- Knowledge of your site's Offsites TPS architecture.
- Knowledge of your site's Offsites operations.
- A working knowledge of VAX/Alpha environment and FORTRAN is beneficial.

Course Topics

You will learn how to....

- Operate the Series 40 OM&S core module software.
- Provide first line support of offsite operations.
- Develop OM&S troubleshooting, tuning and maintenance techniques for your site specific application.
- Make minor configuration changes to tune system and meet operational needs.
- Provide a knowledgeable customer focal point for discussion of OM&S issues among management, operations and maintenance.

Additional Training

To increase your knowledge and skills, there are additional courses available from Automation College.
