

OneWireless™ Integration Overview

Course Overview

Course number: HW50_WBT

Course length: 2 hours

This course provides participants the ability to perform the following tasks as applicable to their system that include:

- OneWireless architecture and the components of a OneWireless system
- Applications and clients that can use OneWireless
- Configuration steps to implement a system
- Support for non-Experion systems using R120
- OneWireless
- Support for Experion systems using Experion releases such as R311.2
- Options for integrating with a DCS system
- Role of a multinode as an access point and mesh network node
- Network management tools to monitor network performance

Course Benefits

Be able to understand the concepts of a OneWireless System and

- Operate the system with confidence
- Transition smoothly to wireless technology
- Explore how OneWireless could be used for your new measurement requirements

Course Delivery Options

- Live Webinar

Who Should Take This Course?

Control system support personnel who need to

- Become familiar with the OneWireless product

Prerequisite/Skill Requirements

Prerequisite Course(s)

- None

Desirable Skills and/or Experience

- Knowledge of DCS system architecture and networking
- Familiarity with field measurement devices
- General understanding of Windows networking

Additional Training

To increase your knowledge and skills, there are additional courses available from Automation College.
